Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 16, 17, 23, 24 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 16, 17, 23, and 24 fails to claim the program recorded on an appropriate computer readable medium so as to be structurally and functionally interrelated to the medium and permit the function of the descriptive material to be realized. No physical transformation takes place. If the result supports a disclosed specific, substantial and credible utility, claims 16, 17, 23, and 24 would be useful. Claims 16, 17, 23, and 24 merely recites a specific application of an abstract idea of retrieving data for a user. It does not pre-empt the idea and is instead just exceptionally broad.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-26, 37 are rejected under 35 U.S.C. 102(b) as being anticipated by Addink (US 6042477).

Addink discloses a data/position sharing system, device and method, comprising first and second devices, wherein the first device comprising current position or attitude information generating means; predicted future position or attitude information generating means; and information transmission means for sequentially generating

current and predicted future position or attitude information for a position or attitude shared object in virtual space. The second device comprising information receiving means for receiving the current position or attitude information and the predicted future information transmitted from the first device and estimated current position or attitude information generating means for sequentially generating estimated current position or attitude information for the position shared object in the virtual space based on the received current position or attitude information and predicted future position or attitude information. The current position represents time and position of the position shared object in the virtual space at that time. The predicted future position information also represents a future time at which the position shared object is at the predicted position in the virtual space (4:37-65; Fig. 2, 3; Claims 5, 12, 17).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please see attached USPTO form PTO-892.
